

# Mothers of the Animal Kingdom

Moms are wonderful creatures. Their job is to nurture their growing baby and then to help it learn to survive in the world, kind of like your own Mom! Here are some amazing mothers in the animal kingdom.

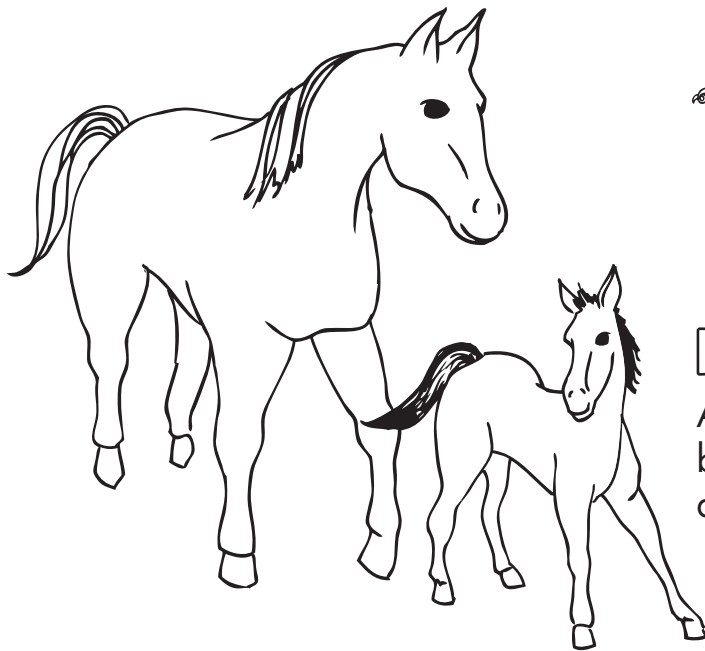

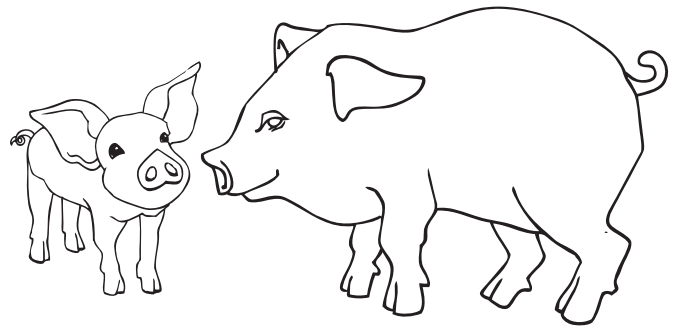

## Chicken

Chickens cluck softly to their young while they are still in the egg.

## Pig

Mother pigs sing to their babies.

## Horse

A mother horse will nudge her baby to stand up just an hour after being born.

## Kangaroo

Kangaroo moms have the original baby carrier—a built-in pouch. When their baby is born, it spends most of its time in this pouch, close to Mom.
